

# Northern Mozambique Rural Resilience Project

2021 - 2026

**World Bank**

Mozambique

---

## NATURE BASED SOLUTIONS

coastal wetlands (excluding mangroves), mangroves

The Northern Mozambique Rural Resilience Project aims to improve access to livelihoods and strengthen natural resource management in rural areas of Northern Mozambique. The project includes mangrove restoration and coastal vegetation initiatives in Nampula and Cabo Delgado to stabilize coastlines, reduce erosion, and support fish spawning areas, alongside efforts to promote sustainable agriculture, fisheries, and community-driven development.
