

Connecting Madagascar for Inclusive Growth Program

2022 - 2028

World Bank

Madagascar

NATURE BASED SOLUTIONS

grassland and other vegetation, indirect non-structural measures

To improve the connectivity, resilience, and management of key infrastructure to enhance access to social and economic opportunities for rural communities and to support international trade and logistics. The project will deploy NBS to enhance climate resilience of road infrastructure. Tree and grass planting for roadway protection and slope stabilization will be used to protect the road and its drainage system.
