

West Africa Food System Resilience Program (FSRP)

2023 - 2029

World Bank

Western and Central Africa (Sierra Leone, Mali, Niger, Togo, Chad, Burkina Faso)

NATURE BASED SOLUTIONS

watershed management

The program aims to strengthen food system resilience across seven West African countries through regional integration, improved food crisis prevention mechanisms, and sustainable management of agricultural landscapes. It promotes climate-adaptive food production, trade, and emergency preparedness to address food insecurity while ensuring effective project governance and monitoring
