

Bangladesh Sustainable Coastal and Marine Fisheries

2019 - 2024

World Bank

Bangladesh

NATURE BASED SOLUTIONS

mangroves, seagrass

The project will promote green infrastructure technologies for seafood production that support broader ecosystem services and coastal defenses, such as mangrove rehabilitation, sea grass, and oyster beds. Importantly, the design of coastal infrastructure will aim to optimize adaptation benefits and avoid maladaptation, including by linking fish habitat restoration to nature-based coastal protection solutions and ensuring climate-resilient value chain infrastructure development.
