

Niger Integrated Urban Development and Multi-sectoral Resilience Project

2022 - 2028

World Bank
Niger

NATURE BASED SOLUTIONS

urban green spaces, forests

The Niger Integrated Urban Development and Multi-sectoral Resilience Project aims to enhance flood resilience, improve urban management, and expand access to basic services in selected municipalities in Niger. The project includes flood risk reduction measures, such as drainage infrastructure and sand dune fixation, as well as urban greening to mitigate temperatures and preserve forests. These initiatives promote sustainable urban development and improve resilience in vulnerable communities.
