

Republic of the Marshall Islands Urban Resilience Project

2022 - 2028

World Bank

Marshall Islands

NATURE BASED SOLUTIONS

mangroves, urban green spaces, coastal wetlands (excluding mangroves)

The Republic of the Marshall Islands Urban Resilience Project aims to strengthen the resilience of select urban areas to natural hazards and climate change. Key activities include risk-informed adaptation planning, coastal resilience investments, and resilient public facility standards, supported by Nature-Based Solutions (NBS) like mangrove restoration and vegetated buffer zones. The project enhances institutional capacity for sustainable adaptation beyond its closure.
