

Sao Tome e Principe Transport Sector Development and Coastal Protection Project

2019 - 2025

World Bank

São Tomé and Príncipe

NATURE BASED SOLUTIONS

watershed management, coastal wetlands (excluding mangroves), grassland and other vegetation

The Sao Tome e Principe Transport Sector Development and Coastal Protection Project aims to enhance connectivity, sustainability, safety, and climate resilience of selected roads. Key activities include training road maintenance community groups to adopt ecosystem-based approaches for stabilization and coastal protection, promoting environmentally sustainable practices.
