United Republic of Tanzania

NATURE BASED SOLUTIONS

urban green spaces

The development objective of the Boosting Inclusive Growth for Zanzibar : Integrated Development Project for Tanzania is to increase access to improved living conditions and service delivery in targeted areas in Zanzibar and to enhance institutional capacity of the government. The project comprises of four components. The first component, area-based integrated urban and infrastructure development finances investments in infrastructure and basic services as well as various support programs to improve the livelihoods of local residents in three types of areas in Zanzibar: (a) urban core, (b) fast-growing urban areas, and (c) towns and villages. The second component, strengthening institutions for urban management and encouraging innovation focuses on institutional development and capacity building, including municipal finance, information and communication technology (ICT), urban management, and enhancing the enabling and regulatory environment. The third component, project management, monitoring and evaluation finances the direct costs of the management and operation of this project. The fourth component, contingent emergency response will have no funding allocation initially and will draw resources from other categories with unallocated expenditure in the case of activation. This project supports physical investments in urban neighborhoods in Zanzibar, including urban green spaces.
