

Water Sector Governance and Infrastructure Support Project

2022 - 2029

World Bank

Nepal

NATURE BASED SOLUTIONS

watershed management, rivers & floodplains

This project strengthens institutional capacity across governance levels to enhance water service delivery in Nepal. It invests in urban, peri-urban, and rural water supply systems, coupled with water quality management and integrated watershed measures to reduce climate-related hazards. The project also enables contingency responses to disasters, ensuring resilience in service delivery.
