

Zhejiang Qiandao Lake and Xin'an River Basin Water Resources and Ecological Environment Protection Project

2018 - 2024

World Bank
China

NATURE BASED SOLUTIONS

watershed management

This project aims to strengthen integrated pollution and watershed management in the Qiandao Lake and Xin'an River Basin through investments in climate-smart agriculture, wetland and forestry ecosystem protection, and improved water and wastewater management. It also builds institutional capacity, including piloting Payment for Ecological Services (PES), to ensure the long-term sustainability of landscape and water resource improvements.
